 **BASALITE**®
CONCRETE PRODUCTS, LLC

Specifications

Style: Square
 Size: 5.5" x 5.5"
 Thickness: 60 mm
 Weight: 6 lbs
 Units/Pallet: 512
 Sq. Ft./Pallet: 107

Style: Rectangle
 Size: 5.5" x 8.25"
 Thickness: 60 mm
 Weight: 8 lbs
 Units/Pallet: 384
 Sq. Ft./Pallet: 121

Style: Mega
 Size: 8.25" x 11"
 Thickness: 60 mm
 Weight: 19 lbs
 Units/Pallet: 160
 Sq. Ft./Pallet: 102

Colors

Positano

Sienna

Although every attempt has been made to display realistic product photos, color may vary due to the printing process. It is recommended that actual product samples be requested, as variations in colors and shades of color on all units, as well as aggregate exposure, are inherent in all integrally-colored concrete products. No claims will be allowed regarding variations in any of the products shown.

Patterns

Random-1

40% Mega, 20% Rectangle and
 40% Square.

Random-2

29% Mega, 42% Rectangle and
 29% Square.

Installation

1. Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material (typically 3 to 6 inches for pedestrian and light vehicular traffic, 6 to 12 inches for heavy vehicular and industrial) or as otherwise directed by site engineer/ architect/landscape architect.
2. Install edge restraint using concrete curb, concrete toe or edging.
3. Place bedding course of sharp normal weight screening or concrete sand to a uniform depth of approximately 1" leveled to grade.
4. Install Basalite® Pavers hand tight with joints approximately 1/8". Where required, cut stones with an approved cutter to fit accurately.
5. Tamp pavers with mechanical vibrator uniformly level true to grade and free of movement. Fill voids in joints by sweeping dry fine sharp sand over pavers.
