Patterns

Square Running Bond

Installation

1. Excavate unsuitable, unstable or unconsolidated subgrade material and compact the area which has been cleared. Backfill and level with dense graded aggregate suitable for base material (typically 3 to 6 inches for pedestrian and light vehicular traffic, 6 to 12 inches for heavy vehicular and industrial) or as otherwise directed by site engineer/architect/landscape architect.
2. Install edge restraint using concrete curb, concrete toe or Edging.
3. Place bedding course of sharp normal weight screening or concrete sand to a uniform depth of approximately 1" leveled to grade.
4. Install Basalite Pavers hand tight with joints approximately 1/8".
5. Where required, cut stones with an approved cutter to fit accurately.
6. Tamp pavers with mechanical vibrator uniformly level true to grade and free of movement.
7. Fill voids in joints by sweeping dry fine sharp sand over pavers.

Although every attempt has been made to display realistic product photographs, color may vary due to the printing process. It is recommended that actual product samples be requested, as variations in colors and shades of color on all units, as well as aggregate exposure, are inherent in all integrally-colored concrete products. No claims will be allowed regarding variations in any of the products shown.
